***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Lingl (# 57414) on 9/9/2005.

The application has been amended as follows:

Claim 30, replace lines 1-5 with "The electric motor as claimed in claim 1,".

***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach an electric motor having a stator connecting section attached to a motor carrier connecting section of a motor carrier using a plug-in joining connection, with vibration isolation elastic elements are arranged in a connecting region between the stator and the motor carrier so that the stator is only indirectly connected to the carrier by the elastic elements, and having spring clamps with a latching section that engage over the motor carrier connection section in the radial and axial direction of the stator to abut against the elastic element and to be latched with the latching section at the end of the motor carrier connecting section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
